Taiwo Oyindamola

Software Developer

I am an experienced Software Developer with 5+ years in the industry.
I have a strong foundation in Web and Mobile development and a passion for creating intuitive and interactive user experiences. I have experience building and maintaining full-stack web applications, with a focus on the front-end using React .
I am experienced in using modern JavaScript libraries and frameworks, such as React, Redux, and Express , to build scalable and performant applications. I have also developed a strong understanding of RESTful API design and development, as well as experience with data modelling and management using MongoDB.
In addition to my technical skills, I am a strong communicator and team player, with the ability to collaborate effectively with cross- functional teams.

Skills:

- Proficiency in JavaScript, HTML, CSS, SASS, GIT, Typescript.
- Proficient in React (JSX, Virtual DOM, Native, React Hooks and Redux)
- Proficient in NodeJS, and MongoDB.
- Bootstrap, Tailwind, Material UI, Ant Design, and Wordpress.
- Familiarity with VueJs, Next.js, and Nest.js
- Testing with Jasmine and Cypress.

Work Experience

FrontEnd Developer
January 2023 - **Present** - **Carbon Tech**

Carbon Tech provides IT solutions to numerous customers in west Africa. Her services span across enterprise applications, infrastructure solutions, business process integration, managed services, network security solutions, software volume licensing, consultancy and advisory services, and IT training.

- Used understanding of React to promote better components lifecycle practices.
- Collaborated with developers on project specifications, strategy, and execution to build scalable web applications.
- Introduced wider use of React and Node.js for web applications, decreasing load time.
- Followed documentation to always remain up-to-speed on what is needed to be updated in response to new releases.
- Built complex applications with React Native and Redux.
- Built admin panels for banking systems while consuming APIs provided.
- Project management with Click Up
- – Daily standups.

FrontEnd Developer
Contract - **Niptrex**

Niptrex is a start-up talent-hiring agency that specializes in finding and recruiting for job positions on behalf of employers. These agencies work with companies of various sizes and industries to help them fill their job vacancies with qualified and suitable candidates.

- As the lead front-end developer, I lead my team in designing and implementing the website's user interface using React Typescript and Redux.
- Collaborated with designers, developers, and project managers to ensure the website meets the project requirements and timelines.
- Integrated the website with backend APIs to fetch and display job listings, candidate profiles, and other relevant information..
